

About ASM Pacific Technology

ASMPT, founded in 1975, is the only company in the world that can offer high-quality equipment for all major steps in the electronics manufacturing process - from carrier for chip interconnection to chip assembly and packaging to SMT. No other supplier offers a comparable range and depth of process expertise.

ASMPT's Back-end Equipment Business offers a diverse product range from bonding to molding and trim & form to the integration of these activities into complete in-line systems for the microelectronics, semiconductor, photonics, and optoelectronics industries. Its Materials Business provides customers with a variety of leadframes such as etched and stamping as well as advanced packaging materials. ASMPT' SMT Solutions develops and sells best-in-class DEK printers for the SMT, semiconductor and solar markets as well as best-in-class SIPLACE SMT placement solutions.

ASMPT is listed in the Hong Kong Stock Exchange since 1989.
