I.T. Recruitment

I.T. Relocation

I.T. Infrastructure

I.T. Outsourcing

Bayou Technology is a Hong Kong based IT Services Provider that specializes in IT Recruitment, Relocation, Infrastructure and Outsourcing. We provide IT solution and architecture design, end-to-end project development and implementation, and managed services to our clients. We manage to provide consistent rapid response to our customers as customers are our top priority and their success is our objective.

I.T. Recuritment

When HR is headache on helping I.T. department to search for qualified I.T. staff & executive, Bayou Technology helps release their pain. We are focusing and specializing in I.T. recruitment. We help from small company to large corporation searching for suitable candidates for their vacancies. With the expertise of I.T. consulting background, Bayou consultants having in-depth I.T. industry knowledge and thus we could find out what type of I.T. staff are well suited their business needs and requirements.

Direct Hire - Permanent

If your objective is to improve your in-house I.T. team or looking for a new IT executive, every person you recruit is an asset of your organization. The accurate recruitment of such specialists is paramount to the development of any organization. It makes good business sense and the advantage of permanent recruitment is simple – talent stays in-house

Temporary - Contract Staffing

Whether your need is that of a short-term replacement staff for maternity leave, sickness or holidays, or a long term temporary replacement, acquire the IT staff temporarily is perfect for these situation. We have a database of skilled personnel to support your requirements. They are employed under Bayou Technology and seconded to your company, then you will reap the benefit from their knowledge base and expertise. This service is sometimes limited because of the labour laws of certain countries.

I.T. Outsourcing

I.T. - H.R. & Admin

As your long-term IT Outsourcing partner, we will regularly provide pragmatic advice, cost saving plan, and safeguard your business from impending perils.

- > Secondment Services
- > Procurement
- > End of Life Management and Recycling

In today's demanding business environment, maintaining operational costs to a minimum level is the main concern, you may begin to realize the benefits of outsourcing I.T. operational services. Instead of maintaining in-house resources to manage your IT systems, you are opting out for outsourcing services. In this case, you purchase only the services that you could minimize the cost.

I.T. Infrastructure

Data Center / Server Room Setup

As the heart of IT operations, it requires to support the mission-critical applications and hosting them in a safe and highly available environment.

The Data Center setup service by Bayou gives you the professional support and guarantee the availability of your infrastructure. Our powerful infrastructure management let you enjoy the benefits of smooth and reliable business processes.

System and Network Setup / Maintenance

With the purpose of "do more with less". We will troubleshoot, identify and eliminate bottlenecks and ensure stability to your network. Our technology expertise and core competencies include Email Messaging, Network Support, Voice System, Security, Data Center. We can help design and setup the IT infrastructure to meet your business needs.

Cabling

Cabling looks like easy, but poor design and maintenance would harden your troubleshooting/tracking when there is any issue. Our qualified staff helps design your cabling structure based on your requirement. We would provide onsite analysis and tailor-made the solution that well suited your expectation.

Procurement

We provide both Hardware and Software procurement services. We would understand your needs and help advice the procurement within your budget. We would also keep inventory of all software and hardware you purchase and provide report upon request.

The procurement process is simple and it releases the trivial work for your I.T. administrator
