

Chinasoft International's Profile

Incorporated in 2000, Chinasoft International Limited (hereinafter referred to as Chinasoft International) is a listed company in the main board of Hong Kong Stock Exchange(HKSE: 354).

In order to meet the current challenges presented by the Internet, cloud computing and big data, the Company is divided into the Technical and Professional service Group (TPG) and the Internet IT service Group (IIG) in light of its business.

TPG mainly provides technical and professional services for key clients and major industries; its goal is to become a full-chain information technology service provider that is based in China, serves global clients and takes the lead in the industry. The Company has in-depth strategic cooperation with industry giants such as Huawei, Microsoft, HSBC, Tencent, Aliyun and China Mobile. Deeply engaged in such key industries as finance, telecommunications, Internet, transportation and energy, the Company continuously expands the global markets, and provides its clients with full-chain, high-quality and high-efficiency technical services with comprehensive advantages and industry characteristics. IIG, centering on "JointForce", constructs core competitiveness aiming at the government and typical long-tailed markets such manufacturing by the way of Internet-based organization. "JointForce" is not only an IT service crowdsourcing platform organized by trusted partners and endorsed by best management practices, but also a working platform where numerous solutions are developed, implemented and integrated.

Relying on both TPG and IIG businesses, Chinasoft International will adhere to its core values of Striving Based, Benefitting Clients, Creating and Sharing, Growing Together; it will endeavor to become a long-term, reliable and trustworthy partner of clients and also a world-class IT service enterprise.
