

## Life at ClusterTech

**“Enabling our colleagues to achieve more in life and become better people is the first priority of our company!”**  
- Dr. Wei Sun, Founder and CEO

**“ClusterTech values my opinions. Here I can realise my ideas and develop my personal interests. I have no regret returning to ClusterTech after 2 years at P&G.”**  
- Mohin Mao, Business Development Manager, joined us in 2009

**“ClusterTech advocates family harmony. I'm so touched by them allowing me to relocate to Beijing office to accompany my fiancée who found a job there.”**  
- Chubo Tsang, Project Manager, joined us in 2005

**“ClusterTech's location by a bicycle track allows me to cycle to work every day. The exercise I obtained from cycling gives me the energy to deal with challenges at work.”**  
- Eric Leung, System Architect, joined us in 2010

**“I so love representing my house to compete against colleagues from other houses for the prizes awarded at the Annual Dinner.”**  
- Lillian Li, Marketing Executive, joined us in 2015

## About ClusterTech

ClusterTech is a leading provider of advanced computing solutions in the Asia-Pacific region. We develop and deploy solutions based on cloud computing, high performance computing, big data and FPGA technologies to solve challenging technical problems and to improve operational efficiency of companies.

Founded in 2000, with headquarters in the Hong Kong Science Park and 7 branch offices in China and Australia, ClusterTech has served hundreds of companies and organisations in Asia-Pacific, Europe and North America. Enjoying over 15 years of steady growth, ClusterTech has extended domain expertise and made advances in computing technologies for financial engineering, business intelligence, environmental sciences, smart city and internet applications.

ClusterTech Offices in China

## Milestones

- 2017** | **2014**  
Became a founding member of the 2<sup>nd</sup> Generation Distributed Computing Alliance led by OpenPOWER Foundation.
- 2013** | **2008**  
Business Intelligence work won Gold Award of "Most Innovative Use of EPC/RP/ID" and Bronze Award of "Best EPC/RP/ID Implementation" in HK RPD Awards 2011.  
Granted the Chinese High-tech Enterprise Certification in Mainland China.  
The High Performance Computing Environment Centre was ranked the "1<sup>st</sup> Best Computing Environment" in the 1<sup>st</sup> China High Performance Computing Industries – Technological Achievement Certificate of Merit.
- 2007** | **2004**  
Became one of the 1<sup>st</sup> cloud service providers for Hong Kong Government.  
Business expanded to Mainland China, Taiwan, United Kingdom, Canada, Australia and Singapore.
- 2003** | **2000**  
Founded and joint hands in the following year with the Chinese University of Hong Kong to establish the Center for Large-Scale Computation (CLO).  
First major institutional clients in Hong Kong.

## Awards

## Products and Services

<p><b>Cloud Computing</b></p> <p>Utilise both private and public cloud computing to assist companies to provide scalable services, gain a competitive advantage in the marketplace, and actualise utilisation of infrastructure resources.</p>	<p><b>Products</b></p> <ul style="list-style-type: none"> <li>Ferret Asia</li> <li>ClusterTech Cloud-computing Management Platform (CCMP)</li> </ul>
<p><b>High Performance Computing (HPC)</b></p> <p>A pioneer in the area, provide customised solutions based on sophisticated models and high-performance cluster software to increase computing capacity, accelerate application processing, and enhance the accuracy of forecasting, analysis and planning.</p>	<p><b>Products</b></p> <ul style="list-style-type: none"> <li>ClusterTech HPC Environment Software Stack (CHESS)</li> <li>CTV-Air Quality System</li> <li>ClusterTech Parallel File System</li> </ul>
<p><b>Big Data</b></p> <p>Offer professional consulting services including business analytics, data mining and predictive analysis in business intelligence for better business decision-making, and operation efficiency, with in-house-developed mathematical models.</p>	<p><b>Products</b></p> <ul style="list-style-type: none"> <li>ClusterTech ConsoAdvisor</li> <li>ClusterTech Prisma</li> </ul> <p>Series :</p> <ul style="list-style-type: none"> <li>CommentPrisma</li> <li>SurveyPrisma</li> <li>MemberPrisma</li> <li>ChicHI</li> </ul>
<p><b>Field-Programmable Gate Array (FPGA)</b></p> <p>Develop FPGA technology to significantly speed up image processing, data compression and decompression, and erasure code encoding and decoding to utilise memory and disk storage more efficiently in data center.</p>	<p><b>Products</b></p> <ul style="list-style-type: none"> <li>Lightning Image Processor (US patent pending)</li> <li>Accelerated Data Compressor</li> <li>Accelerated-RAID Erasure Code</li> </ul>

## Work at ClusterTech

We joined ClusterTech – for an exciting yet secure career future; for a meaningful endeavor and for our personal and professional development.

Although I had limited exposure to software development at college, ClusterTech has helped me adapt to the new field and become productive. It is amazing that I can now design good Web UIs with little supervision only after 3 months of careful guidance.

**Chris Tang**  
Software Engineer  
Joined us in 2014

BEng in Electronic and Information Engineering, HKU

ClusterTech's products cover a wide range of technologies. Compared with my experiences at Apple Inc. and PWC, I am challenged with more intriguing problems that allow me to improve myself and give me a greater sense of accomplishment.

**Angelos Ching**  
System Engineer  
Joined us in 2014

BEng in Information Engineering, CUHK

Over the last five years at ClusterTech, I was given many opportunities to use my creativity and analytical skills to bring value to our clients. The experiences in management and technical knowledge I gained from my work keep me competitive. ClusterTech also helped me advance to my current position very quickly.

**Ada Yung**  
Principal Scientist  
Joined us in 2010

MPhil in Computational Fluid Dynamics, HKU;  
BSc in Mathematics (Major) and Computer Science (Minor), HKU

ClusterTech entrusts me, a senior software engineer, to take leadership roles in solution design and development. I solve customers' problems in major projects and, unlike start-ups, ClusterTech provides abundant resources for me to extend my skill set and reach my full potential. Our well-constructed project management process allows me to work ultra efficiently.

**Emprise Chan**  
Senior Software Engineer  
Joined us in 2013

MPhil in Computer Science, HKUST;  
BSc in Computer Science & Mathematics, HKUST

My major was highly specialised, yet ClusterTech was able to assign me to projects based on my strengths and capabilities. Through working closely with senior colleagues skilled in various technology domains and taking up different types of projects, I can picture more career development options for my future.

**Chiaki Yang**  
Computational Scientist  
Joined us in 2014

MSc in Ge-information Science, CUHK;  
BSc in Geographic Information System, Suzhou University of Science and Technology
