

Global TOP Talents to YOUR Company

Our Worldwide Network

Our database holds approx.200,000 registrants from 130countries. This rich network of top global talents is built on both online sources and various worldwide networking events: "TOP CAREER".

Bringing Hope and Dream by Offering Opportunities to Seize Global Challenges.

In 2007, Fourth Valley Concierge Corporation's venture started in a small room in Tokyo. Since then, we have always been aiming to become a leading Japanese company in the world by providing global and innovative services and our goal is to bring dream and hope to the young talents from all over the world.

Although we are today living in a global economy, there are limited opportunities for young people who want to take challenges beyond the borders of the country they live in. Through our mission of "offering opportunities to seize global challenges", we have been creating a global network by visiting universities and companies worldwide. Currently, we have a rich database of nearly 100,000 registrants from approx. 100 countries under our brand, TOP CAREER.

We provide support to those who are looking for exchange programs, internships, and overseas careers. We will keep on striving to increase our database to a million registrants in order to network global top professionals from various fields ranging from business to sports to cooking, etc., and establish 100 branches in the next 5 years to become a global company which will provide dream and hope to young talents all over the world.

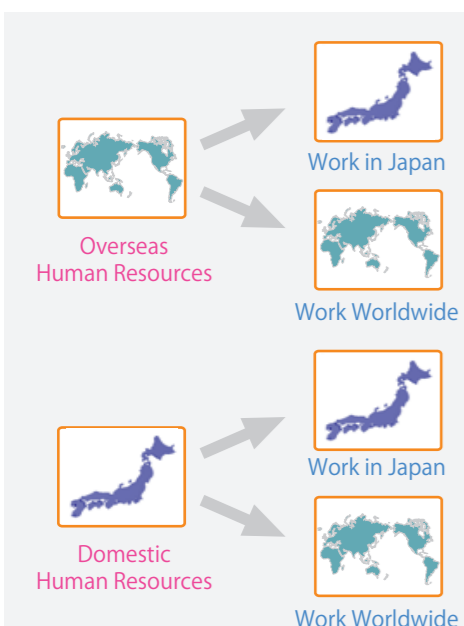

Profile — Born in Tokyo in 1975, spent his early years in London. Joined Sony after graduating from Sophia University, Tokyo. Conducted business with global companies such as Samsung, Motorola, and Nokia. Established Fourth Valley Concierge Corporation after leaving Sony in 2007. Part-time lecturer at Sophia University.

Young Global Leaders(YGL) 2013, the World Economic Forum(Davos Forum).

Our Services

Recruit competent talents around the world. Recruitment support .

TOP CAREER JAPAN

We support international students studying at universities and colleges in Japan to get jobs in Japan. We host Japan's biggest joint job fairs for international students in Tokyo and Osaka as well as support to hold seminars and interviews for individual companies.

TOP CAREER JAPAN to Global

We support international students studying at universities and colleges in Japan to get jobs in other countries than Japan, not limited to their home country but countries all over the world.

TOP CAREER International

We support both international and Japanese students studying at universities in other countries than Japan to get jobs in Japan. We host job fairs and interviews Japanese companies jointly participate in as well as arrange on-campus screening for individual companies in those countries.

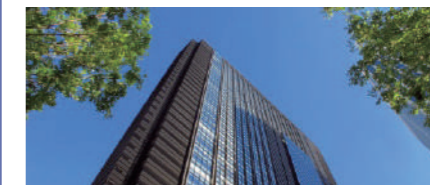

Service for educational institutions

TOP CAREER STUDY ABROAD

From Japan to the world and the world to Japan. We support schools to recruit students across the border. We also provide the PR and promotion services for schools.

New business

Japan Center

For aspiring youths who aim to work in Japan, Japan Center provides Japanese language and work culture training to pass the job interview and quickly start up as a professional at a company in Japan.

Next-generation policy recommendations regarding the acceptance of foreigners

We make a proposal to the government and private companies about how to acquire human resources needed in Japan at present based on our research about the employment situation of foreigners including international students according to VISA status in Japan.

An online service connecting talents in the world

CONNECT

CONNECT is an online platform instantly connecting university graduates, career professionals and students who envision working and studying overseas with the companies, research institutions and universities who seek talents beyond the border. Prospective candidates would not only input their academic background, internship experiences and professional career but also take aptitude tests measuring their language and programming (for IT engineers) skills. Companies and universities would then be able to directly approach those applicants that fit their required profiles based on their histories and quantified abilities.
