

Edvenue® Limited - Our education venue

Serving over 450 schools since 2002, Edvenue® Limited is an Education Services Provider specialized in generic skills and STEM training programs for the secondary and primary schools in Hong Kong. We are a well-recognized brand among schools with commitment to top-quality training services, e-learning solutions and education apps development services.

We are passionate about what we do as we strongly believe that generic skills (problem solving, critical thinking, creativity, communications, etc.) and STEM (Science, Technology, Engineering & Mathematics) can help our next generation succeed, not only academically for school exams, but also holistically for their life-long journey in this ever changing world. Over the years, we are very pleased to see the positive impact that our programs have made on the students and we are motivated by the appreciation and encouragement from the students, teachers and parents.
