

Harmonic provides the supply chain infrastructure — from production through delivery — that enables media companies to engage and prosper in today's demanding and ever-changing video economy.

We are the worldwide leader in video delivery infrastructure solutions and the first to provide broadcasters, pay-tv operators, service providers and other media companies with differentiating video capabilities that are ready to deploy on a global scale. At Harmonic we help our customers respond to the challenges of the digital video revolution while reaping its benefits, including the ability to deliver stunning video to viewers on any screen, anywhere.

Our innovative solutions power everything from HEVC (High-Efficiency Video Coding) compression of Ultra HD video, to cloud media processing for over-the-top (OTT) video delivery, to simplified video, voice and data delivery via innovative Converged Cable Access Platform (CCAP) systems.
