

Micron in Taiwan

Micron's global footprint is designed to deliver comprehensive customer collaboration, support and quality around the world and throughout the product life cycle.

Taiwan plays a critical role in strengthening our position in leading-edge DRAM.

Micron's Taiwan sites include sales and technical support in Taipei, along with two state-of-the-art fabrication facilities in Taichung and Taoyuan and a back-end facility in Taoyuan, that together comprise the company's DRAM Center of Excellence. The center's goal is to achieve the most efficient and effective technology transfer and manufacturing ramp by combining front- and back-end manufacturing, product engineering and technology development roles

At a Glance

Headquarters

Boise, Idaho, USA

Market Position

6th largest semiconductor company

Team Members

34,000+ in 17 countries

Products

Largest portfolio of memory and storage technologies

Age

Nearly 40 years strong

Fortune 500

Ranked #226 in 2016

Locations

12 manufacturing sites

Segments

Compute, consumer, networking, storage, embedded and mobile products

Size

3rd largest memory company in the world

FY17 Net Sales

\$20.3B

Patents

~20,000 and growing
