## Testimonials from Intern and Employer

### Intern

**Computer Sciences student, CUHK  
Software Development Engineer in  
Microsoft Shanghai**

"It is my pleasure to work as an intern in Microsoft and it was a memorable experience in participating in Microsoft's worldwide Hackathon. Not only gained experience in real software engineering role and that helped me get prepared for graduate job. My projects received very positive feedbacks from the team and senior leadership. I was so excited to have an interview opportunity for "Full-Time Employee conversion"."

### Employer

**Principal Technologist of CTO Office,  
EMC China**

"Supervisors from EMC appreciated the efforts of interns and recognized their work quality. They recorded a very cool demo video and submitted it to a Pi-Hack hosted by Office of CTO of EMC. The team won the runner-up of "Most creative use of a small compute device" category."
