

## **International Graduate Program**

We are one of the world's most international banks, offering graduates opportunities across Asia, Africa and the Middle East. Right from the start of the International Graduate Programme, you'll dive into our global network with a five-week International Induction Programme (IIP) in incredible Shanghai. Our IIP is your chance to connect with more than 270+ IGs from the 30+ countries that we recruit from.

The IG Programme comprises six business streams, aligned to our business banking areas. Each stream is focused on a unique part of the Bank, allowing you to select a business area based on your interests and help you develop specialist experience right from the start of your career.

After your first year as part of the Programme, you might join one of our local, regional or global teams. For half of our grads, their first role means an international move.

## **Internship**

Our Internships are typically two months in length. As an Intern, you will have the opportunity to perform real work, to build up your experience and to build your professional network. Along the way, you will develop valuable skills and experience, and benefit from the close support and guidance provided by our senior staff and former Interns and Graduates.

At the end of our internships, high performers can secure places on our International Graduate Programme.
